

Connect-it Power 4-way & 6-way 16A

Audiophile 'high current' power strip

- Especially for use with audio equipment
- No sound degradation through filters or overload protection
- High power capability (compliant to IEC 60320 standards)
- Extended connector distance for use with big power supplies
- Magnetically shielding by 0,8mm metal casing
- Optimised cooling and fire protection
- Available with 4 or 6 AC outlets (EU, UK, France-CZ, US)
- Maximum continuous current 16 amperes
- High-quality AC-outlets (nickel-plated brass)
- High quality inner cabling (2,5mm²), crimped not soldered
- Detachable 1,5m standard power cord supplied
- Handmade in EC

INPUT:	C20 (High Current)
OUTPUT:	4way EU, France-CZ, UK, US 6way EU, France-CZ,UK, US
INNERCABLING:	2,5mm ² NKT
CURRENT (continuous):	16 Ampere for complete power strip
SAFETY CERTIFICATION:	IEC EN 60884-1:2002
COLOUR:	grey
DIMENSIONS (WHD):	286 x 73 x 53 mm (4-way) 402 x 73 x 53 mm (6-way)
WEIGHT:	730 g Connect-it Power 4-way 980 g Connect-it Power 6-way

No filtering or overload protection, just pure power transmission, best connectivity & magnetic shielding!

One of the most overlooked categories in all of audiophilia is providing clean, accurate AC power. *Connect it Power* products can improve your system's performance for a wide variety of equipment ranging from power amps to source components and beyond. Contrary to most conventional power strips, that use modest filtering and fuses, *Connect it Power* strips avoid sound degradation through inferior components and guarantee pure high power mains transmission between a hifi system and mains. Due to extended power headroom, *Connect-it Power 16A* power strips are the ideal solution for connecting up to 4 or 6 components to a single wall outlet. A significant improvement in performance can be achieved, when more than one component is connected, even if each of these does not require a separate 16A high power connection. A full metal body leaves no chance for electromagnetic interferences.

Connect-it Power 16A power strips use C20 high power input connector, that allow optional use special high-grade 16A power cords with desired length, like *Connect-it power cable 16A* (see detailed product information)!

Optional upgrade:

**Connect it Power
Cable 1,0m 16A
SRP
149,00 €**

Available lengths:
1,0 / 1,5 / 2,0 / 3,0m

Most audiophile power strips use 10A connection, but you will need 16A to fully enjoy the real potential of equipment and high grade power cabling!
