

Pick it MC-1 & Pick it MC-1H

Phono cartridge for turntables

- Moving Coil principle
- More dynamic playback than MM cartridges
- High trackability
- MC-1 suits nearly all preamplifiers/step-up transformers
- MC-1H connects directly to MM phono preamp
- Suitable for light to medium tonearm mass
- 1/2-inch mount
- As with all MC cartridges, stylus can not be exchanged

Technical data:	MC-1	MC-1H
Weight:	4,1g	4,1g
Stylus type:	Elliptical	Elliptical
Stylus tip radius:	8 x 18 µm	8 x 18 µm
Frequency response:	20 - 22000 Hz	20 - 22.000 Hz
Output voltage:	0,5 mV	2,3 mV
Channel separation:	>23dB	>23dB
Compliance:	12/12 µm/mN	13/13 µm/mN
Tracking force:	2,2 - 2,7g	1,8-2,2 g
Recommended tracking force:	2,5g	2,0 g
Tracking ability (315 Hz, lateral):	>70 µm	>70 µm
Vertical tracking angle	20°	20°
Coil impedance:	10 Ω	100 Ω
Recommended load resistance:	> 10 Ω	47 kΩ

Low cost upgrade for audiophile vinyl experience!

The selection of a phonographic cartridge is very important for the quality level of your turntables sound reproduction. MC (Moving Coil) cartridges offer far better sound reproduction levels than conventional MM (Moving Magnet) can do. **Pick-it MC-1** needs a special MC-preamplifier, in contrast **Pick it MC-1H** is a high-output cartridge, that can be connected directly to MM inputs, offering fine, natural and lively sound reproduction of MC without the need of an additional amplifier stage. Everyone who seeks for the fast, dynamic high-grade playback quality of Moving Coil (MC) cartridges and wants to upgrade an existing cartridge, will be fascinated by the excellent price-to-performance ratio of **Pick it** cartridges.
