

Speaker Box 15 DS2

Flagship floorstanding speaker

MSRP / pair 1.990 € (incl. VAT)

Wooden finishes:  

- Audiophile 2.5-way design
- Rear port bass reflex cabinet
- Sophisticated internal bracing
- Ultra stiff non resonating MDF cabinet
- Gravity mass-point by sand filled cabinet
- Audiophile direct-wired crossover - no PCB!
- Lead free solder
- Ecofriendly glue from Kleiberit
- Real wood finishes in 2 options
- Acoustically transparent front cover with magnetic attachment
- Gold-plated speaker terminal (single-wired)
- Height-adjustable spike feet with supports
- Handmade in Europe

Sensitivity (1W/1m): 90dB

Recommended amplifier power: 20 to 250 watts

Tweeter: 25mm Ø silk-ring

Neodymium magnet

Woofers: 150mm Ø fiberglass-cone (2pcs)

Cabinet material: MDF (Ø 19mm per side)

Frequency response: 35Hz - 22kHz

Nominal impedance: 4 ohms

Dimensions B x H x T: 160 x 978 x 260mm

Weight: 20.6kg (per piece)

Wooden finishes: walnut, eucalyptus

Rediscover your favourite music with our passion for sound!

Speaker Box 15 DS2 represents our flagship loudspeaker and pinnacle in design. With its heavy weight it will stand strong and stable while making sure that unwanted vibrations will not be transmitted. A special separate cabinet, filled with sand, is used to create a gravity masspoint for best vibration absorption and optimum stability.

Speaker Box 15 DS2 features our summit of sound, shockingly engaging and detailed with a soundstage that is so realistic you will think you are at a live venue! Life-like mids to breath emotion into any instrument, powerful and strong bass to get your feet moving, all coupled with airy and well pronounced treble for superior micro-details are the key characteristics of this revolution in loudspeaker design!

The Speaker Box 15 DS2 is available in two noble wooden finishes, walnut and eucalyptus. They perfectly match our EISA award winning The Classic turntable, our elegant DS2 line and will fit in any room with their luxurious aesthetics! The Speaker Box 15 S2 comes with high quality spikes to decouple the loudspeaker from the floor.

All our speakers have to withstand extreme condition-tests to make sure that they fit our highest standards. Speaker Box 15 DS2 outranks many more expensive loudspeakers with its superior soundquality and intelligent, no-nonsense craftsmanship.

walnut

eucalyptus

The 150 millimeter fiberglass-cone mid/bass drivers are responsible for a balanced and homogenous sound. Organic and wide they will transform your listening-experience into something very unique. The special form behind the cones protects the driver from any reflecting waves. Warm and clear mids with natural body paired with solid and punchy bass will convince every listener!

The 25 millimeter silk-ring tweeter offers an immensely detailed and airy sound with clear highs, which are tuned bright but also deliver a good portion of warmth.

The 19mm thick cabinet is perfectly made to block any sound-leakage. The interior of the loudspeakers is kept to be as simple as possible. The PCB-less design guarantees an undisturbed signal-path to the drivers.

The lowest fifth of the speakers is filled with sand, which adds valuable weight to ensure flawless decoupling.

We used our audiophile best-buy cable, Connect it LS, for internal wiring. It offers outstanding fidelity and transparency, which makes our loudspeakers deliver their unique sound!

High quality and timeless

A lot of speaker manufacturers have lost the real tradition of european craftsmanship in the past decades. Before the millenium almost 90 percent of all loudspeakers, in any price-range, have been made in either Europe or the USA. Today nearly 99 percent of speakers up to 4000€ are made in far-east. The trend also went into a direction where speakers have been over-designed with extravagant looks and low-quality materials. Unfortunately a majority today is made of resonant

particleboard, is covered with strange lacquers or even plastic! Even though these materials are very cheap the prices for the speakers go stadiily up.

In tradition of the Pro-Ject philosophy we have kept our S2 and DS2 speakers as simple and elegant as possible, with beautiful real wood veneer, top notch components and best build-quality! Take as an example our extreme precisely made corners. All in favour of the sound and a timeless design!
