Real-wood veneer: 

Satin:     

- 2.5-way bass reflex principle
- Audiophile frequency response
- Cutting edge fiber glass carbon composite woofer
- Ultra transparent and detailed sound stage
- Gravity mass-point by sand filled cabinet
- Gold plated banana terminals
- Non-resonating MDF cabinet
- Magnetic speaker grills included

Enclosure type: bass reflex via rear firing port

Recommended amplifier power: 20 to 200 watts

Frequency response: 42Hz - 20kHz

Nominal impedance: 4 ohms

Sensitivity: 89dB (1w /1m)

Chassis: 1" silk dome tweeter

 2 x 6,5" carbon fiber glass bass/mid

Dimensions: 1100 x 165 x 220 mm (HxWxD)

Weight: 15,17 kg each

Reference Floorstanding Speaker

The Speaker Box 12 E Carbon features a 1" silk dome tweeter, paired with two special 6,5" fiber glass carbon composite woofer. Due to the 2.5-way design the bottom woofer is playing just the low frequencies which fills every room with powerful bass.

Mounted into an ultra stiff non resonating MDF cabinet, these chassis deliver an audiophile music reproduction.

We recommend connecting it with an amplifier with an output power of at least 20 watts per channel. The Stereo Box DS3 or MaiA DS3 are perfect partners for this speaker.

The look of the Speaker Box 12 E Carbon is subtle but classy, allowing it to be included in any interior style. You won't find any visible screws on the front and the included speakers grills are attached with magnets.

A special separate cabinet, filled with sand, is used to create a gravity masspoint for best vibration absorption and optimum stability.

It is available in five beautiful satin painted finishes and in a real wood walnut veneer to match every listeners preferences. Speaker grills in black are included in the box.

Audiophile listening experience

The Speaker Box 12 E Carbon delivers an audiophile flat frequency response from 42 to 20.000 Hz. It offers a highly natural sound stage paired with powerful deep bass.

Speaker Box 12 E Carbon brings the live music feeling to your living room. The two 6,5" carbon fiber glass bass/mid drivers are responsible for a balanced and homogenous sound. Warm and clear mids with natural body paired with solid and punchy bass will convince every listener!

The double terminal block allows bi-wiring and bi-amplification. Bi-amping is standard in professional audio applications and lets you power the woofers and the tweeter with separate amplifiers. This results in a greater level of clarity and reduces the risk of distortion.
